EDUCATION

University of Guelph

Guelph, ON

Bachelor of Computing, Major in Software Engineering (Co-op), Minor in Sustainable Business Sept. 2023 – Present

- Placed on Dean's Honour's List for the Fall 2023, Winter 2024 Fall 2024 and Winter 2026 Semesters, awarded to students who have obtained a minimum semester average of 80%

WORK EXPERIENCE

Arup

Toronto, ON

Digital Technology Intern

May. 2026 – Present

- Resolved 65+ monthly Tier 1-2 IT incidents and requests via ServiceNow, diagnosing complex hardware and software root causes, including docking station failures and ghost-typing keyboards.
- Managed end-to-end device imaging and laptop lifecycles, troubleshooting BIOS/firmware (HPIA) and diagnosing persistent BitLocker recovery-loop incidents using PowerShell
- Enrolled and provisioned devices utilizing Microsoft Autopilot and Intune, while managing enterprise application deployments and cache validation via SCCM/Software Center.
- Administered Active Directory / Entra ID to support a firm-wide Secure Authentication rollout (Windows Hello for Business / Passkeys), resolving MFA lockouts, and issuing Temporary Access Passwords (TAP)
- Authored technical step-by-step documentation (OneNote/SharePoint) standardizing team processes for TAP issuance, laptop validation, and BitLocker recovery.

University of Guelph Computing and Communications Services (CCS)

Guelph, ON

Student IT Consultant

May. 2025 – Present

- Resolved 75+ Tier 1–2 IT support tickets weekly, diagnosing identity (LDAP, Active Directory, Azure), network connectivity, MFA, and Office 365 issues while improving first-contact resolution and Help Centre response efficiency.
- Collaborated with cybersecurity, networking, and identity teams to escalate complex cases and authored clear documentation and IT Help articles, supporting asset tracking and standardized device troubleshooting across the department
- Simplified complex technical issues for 100+ users per month across phone, email, and in-person support, improving user satisfaction and reducing follow-up questions while independently troubleshooting unfamiliar problems using internal tools and knowledge bases.

PROJECTS

Crime.ly | React, Django, Python, MariaDB, Git, Trello, Docker

Jan. 2026 – Apr. 2026

- Developed a full-stack crime data platform with an 8-person team using React and Django.
- Built interactive geographic, heatmap, scatterplot, and line graph visualizations with real Toronto crime data.
- Cleaned and combined Toronto Police and Census data for neighbourhood-level analysis.
- Rebuilt Power BI visualizations in React for greater control over filtering and user interaction.

GryphXChange | Flutter, Dart, Firebase, Firestore, Riverpod

Jan. 2026 – Apr. 2026

- Developed a mobile marketplace application for students to buy, sell, and trade textbooks and other items.
- Implemented Firebase authentication, real-time listings, wishlists, offers, image storage, and user profiles.
- Developed QR-based trade verification with transaction tracking, meetup scheduling, and user ratings.
- Integrated ISBN scanning and the Google Books API to streamline textbook listing creation.
